Pruning:
1. Remove "Hotel Name" since it is not required
2. Remove "Customer Name" and "Customer Birthday" since it is not required
3. Remove "Customer City" because is not required
Grafting:
1. Applied on "Customer ID" and "Customer Location" because we are interested
on the analysis with respect to the "Customer Region" and "Customer Country"
2. Applied on "Rooms_Number + Hotel_ID" and "Hotel_ID" and "Hotel_Address" because we are
interested on the analysis with respect to the Hotel city -> Hotel region -> Hotel country
